POST OFFICE BOX SERVICE ENHANCEMENTS

DOCKET NO. MC2012-26

REPLY COMMENTS OF DAVID B. POPKIN

August 14, 2012

Respectfully submitted,

PRCMC201226REPLYCOMMENTS

DAVID B. POPKIN, POST OFFICE BOX 528, ENGLEWOOD, NJ 07631-0528

The following are my Reply Comments Brief in the above referenced Docket.

Most of the comments filed by the owners of the CMRAs pointed out that the enhancements proposed by the Postal Service include the ability of a Post Office Box holder to receive delivery of private shippers such as UPS and Fedex at their post office street address.

This raises a number of questions regarding the delivery of these articles:

1. What happens if the private shipper requires a signature on delivery?
2. Will the post office box holder be required to sign up for Signature on File in addition to Street Addressing Service?
3. Will the Form 3849 completed by the box holder be capable of being scanned into the signature unit used by the private carrier?
4. Will the Form 3849 be physically available at the retail post office window to be utilized by the private carrier when the article is delivered?
5. Will the private carrier attempt to obtain a signature as a default on interacting with a human addressee?
6. Can the private carrier leave a notice of attempted delivery to be placed in the post office box for completing prior to an attempted redelivery?
7. How will the post office box holder be aware of whether an order placed with a supplier who will use a private carrier will require a signature or not?
